

## FAN VENTURIS

York Metal Products offers spun metal venturi for a variety of applications. Available in various sizes and depths, venturi fans are offered in individual fan venturis or complete fan assemblies.

Our processes allow for the customization of venturi shapes, depths, hole patterns and panel sizes for greater efficiency and noise reduction.

For larger volume orders, we have a variety of stock and hold options to meet the specific needs of our customers.

## COMPANY PROFILE

We work closely with our customers to develop improved designs and processes that lower cost and improve performance. Every project is reviewed with our customers, so we can live and breathe customer challenges and eliminate quality issues.

Our selection of processes is unique. We offer a combination of CNC Metal Spinning, CNC Tube Rolling with Laser Welding, CNC Fabrication, Multi Axis Lasers and Engineering, which can reduce the number of manufacturing operations and processes by up to 80%, and cut overall lead time by up to 50%.

At York Metal Products, you can expect nothing but the best. It's the only thing we know how to deliver. Our systems are designed to continuously improve quality and reliability and are backed by ISO 9001:2008 and 14001:2004 certifications.

100% contract review with our customers. Guaranteed.

**WE MAKE THE COMPLEX SIMPLE.** We work closely with you to decrease the number of components, streamline operations and save on processing and assembly time with the goal of reducing your inventory needs by half. We can help decrease the overall cost of your products while maintaining their quality and integrity.

## STANDARD FEATURES

### MATERIAL

Steel                      Galvanized  
Stainless Steel        Aluminum

### Depth

Up to 12"

### DIAMETERS

Venturi: From 4" to 54"

### PANEL SIZE

With standard diameters, panel sizes available up to 84"

### OPTIONS

Any Hole pattern required  
Flat or with bent flanges  
Complete assembly, including motor mount
